LEON MUYESU

Full-Stack Software Developer & System Designer

Nairobi, Kenya · +254 794 883 394 · leonmuyesu15@gmail.com·

GitHub · LinkedIn · Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building web applications across healthcare and climate-focused projects. Skilled in React, Node.js, Django, and Python, with experience across the full development lifecycle—from understanding requirements and designing solutions to implementation and delivery. Focused on creating reliable, user-centered products that solve complex problems and support business goals.

TECHNICAL SKILLS

Frontend	React, SvelteKit, Vue.js, HTML5, CSS3, JavaScript (ES6+), D3.js, Responsive Design, UI/UX
Backend	Node.js, Express, Django, Python, RESTful APIs, Authentication & Authorization
Database	PostgreSQL, MySQL, Database Design & Query Optimisation
DevOps	Git, GitHub, Docker, CI/CD Pipelines, Agile/Scrum, Technical Documentation
Competencies	Full-Stack Architecture, System Design, Data Analysis, Software Testing, Team Leadership

PROFESSIONAL EXPERIENCE

Software Development Intern | Dockonnect

May 2024 – July 2024 | Remote, Nairobi

- Designed and developed UI/UX components for a hospital management system used across multiple healthcare facilities, improving information architecture and user workflows.
- Streamlined healthcare data collection and reporting processes, helping improve data accuracy and reduce manual reconciliation for clinical staff.
- Created technical documentation adopted as an organizational reference, supporting developer onboarding and reducing support needs.
- Delivered features within Agile/Scrum sprints, collaborating with clinical stakeholders to align software functionality with real-world workflows**.**

Research & Development Intern | Pan African Climate Justice Alliance (PACJA)

May 2023 – July 2023 | On-site, Nairobi

- Conducted environmental impact research to support policy advocacy campaigns and stakeholder recommendations.
- Co-developed a climate data visualization prototype that helped stakeholders interpret environmental datasets and reduced reliance on manual reporting.
- Processed and validated datasets using Python, applying data integrity checks to support evidence-based climate decision-making.

KEY PROJECTS

Hockey K.E — Sports Analytics Dashboard — *React · Node.js · PostgreSQL · D3.js*

- Built a performance-tracking dashboard for 15+ Kenyan grassroots hockey teams, integrating D3.js visualisations that let coaches analyse player statistics and game trends 60% faster.
- Deployed scalable backend infrastructure supporting concurrent users with consistent <2s load times; designed database schema to support multi-team season tracking.

Team-Todo — Team Task Management App — *Django 5 · Python · PostgreSQL · Bootstrap 5 · Chart.js · Full-Calendar*

- Built a production-ready Django application for team task management with role-based access control across three tiers: Admin, Team Leader, and Member — enforcing permission boundaries at every layer.
- Implemented feature-rich dashboards with Chart.js analytics, task CRUD, real-time notifications, deadline reminders via Full-Calendar, and search/export functionality for operational reporting.
- Designed a normalised PostgreSQL schema to support multi-team workflows, ensuring data integrity and query efficiency across concurrent users.

AI Query Interface — LLM-Powered Web App — *FastAPI · Python · Next.js · TypeScript · TailwindCSS · Google Gemini API*

- Engineered a full-stack application delivering an intuitive interface for AI-powered queries, integrating Google Gemini LLM via a FastAPI backend with structured prompt handling and streaming support.
- Built a responsive Next.js frontend in TypeScript with TailwindCSS, rendering real-time formatted AI responses with smooth UX and minimal latency.
- Architected a clean API contract between frontend and backend, enabling seamless LLM model swaps and straightforward feature extension.

Personal Portfolio Website — *React · Vue.js · Vite*

- Built and deployed a responsive portfolio achieving a 95+ Google Lighthouse performance score; implemented dynamic content management and a contact form with server-side email integration.

EDUCATION

BSc Computer Science | **Multimedia University of Kenya** | *Graduated 2025* | *Second Class (Upper Division)*
Relevant coursework: Data Structures & Algorithms, Web Development, Database Management, OOP, Software Engineering, Operating Systems.

Kenya Certificate of Secondary Education (KCSE) | **The Nairobi School** | *2017-2021* | *Grade: A−(minus)*
